EDUCATION

The Pennsylvania State University, USA Master of Science, Computer Science	2025 – 2027 CGPA: 4/4
Madras Institute of Technology, Anna University, India Bachelor of Engineering, Computer Science and Engineering	2020 – 2024 CGPA: 3.94/4
Indian Institute of Technology, Madras, India Bachelor of Science, Data Science & Programming (Hybrid)	2020 – 2024 CGPA: 3.73/4

SKILLS

Languages & Database – Python, Java, C++/C, JavaScript, C#, Bash, Oracle SQL, MySQL, PostgreSQL, MongoDB, Redis, SQLite

Web Technologies – Flask, ReactJS, Vue.js, Bootstrap, Node.js, Express, HTML5, CSS3, REST APIs, JSP

Machine Learning & Data Science – NumPy, Pandas, Scikit-Learn, TensorFlow, Keras, Matplotlib, Tableau, OpenCV

Tools & Platforms – Oracle APEX, Git, Jenkins, Docker, Kubernetes, OCI, AWS, GCP

WORK EXPERIENCE

Associate Applications Developer Oracle India Pvt. Ltd. • Enhanced an enterprise-scale release management platform (100+ users across APAC and EMEA) by designing and deploying 2 new workflows using PL/SQL, JavaScript, and Oracle APEX, reducing manual scheduling (~20% improvement). • Designed and developed a Jira ticket dashboard (150+ DAUs), reducing weekly status meetings by ~20% and accelerating ticket resolution time by 5%. • Contributed to 3 Oracle SDK releases, implementing core features and bug fixes that improved developer experience and ensured on-schedule delivery of enterprise updates. • Resolved key bugs and wrote JUnit tests implemented improvements that increased system reliability and reduced release-related delays by ~10%. • Developed automation scripts that streamlined recurring processes, saving ~2–3 hours per engineer weekly (~120+ hours annually team-wide). • Authored Confluence documentation and delivered 3+ KT sessions for cross-team adoption, ensuring knowledge continuity and reducing onboarding time for new engineers by ~25%. • Analyzed and optimized Oracle Cloud Infrastructure (OCI) logs to identify and eliminate redundant entries. Resolved a Fortify-detected cybersecurity vulnerability by debugging and validating secure code implementation.	08/2024 – 08/2025 Hyderabad, India
Project Intern Oracle India Pvt Ltd • Automated regression testing flows with Oracle Utilities Testing Accelerator (OUTA), boosting test coverage by ~30% and reducing manual QA effort by ~40%, enabling release cycles to shorten by ~1 week. • Built and deployed an energy forecasting model adopted by 10+ data science team members, improving prediction accuracy by ~20% over previous model using Oracle ADB, Java, and Selenium • Partnered with QA and deployment teams to standardize processes, creating test case documentation and re-usable runbooks that reduced onboarding time for interns/new hires by ~25%.	01/2024 – 07/2024 Hyderabad, India
Summer Intern Citi CSC • Automated script generation through a web-based tool, eliminating manual edits and saving ~200 man-hours annually across the DBA team using Oracle SQL, JSP, JS, Java, and HTML. • Delivered solutions ahead of an 8-week project timeline, earning recognition from team leads for efficiency.	06/2023 – 08/2023 Chennai, India

ACADEMIC PROJECTS

PixEdit : Text-Based Image Modification for Content Creation 🔗

Built a text-guided image editing system using Grounded-DINO, SAM, and LaMa inpainting; implemented object segmentation, removal, and recoloring pipelines with a Flask REST API backend running fully on CPU.

Deepfake Video Detection Using EfficientNet-V2 & ViT Complementary Network

Built a deepfake detection framework combining EfficientNet-V2 and Vision Transformer, implementing a fusion mechanism and hyperparameter tuning to improve detection accuracy by ~12% on a dataset of 5,000+ videos while optimizing computational efficiency.
